Claim Rejections - 35 USC § 112

Claims 33-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preambles of all the claims are directed to "a test strip" but fail to provide any reagent to perform the function of testing.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 33-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gin et al., Nagase et al.

These reference teach test device for the collection of tear fluids. The devices all have a notch adjacent to the sample collection area.

Claims 33-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Poto et al.

Poto et al. teach test strips(12) having a sample application port(20) and angled tab(40) that has been read on the claimed indented edge/notch.

Claims 33-38 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Galen et al.

Galen et al. teach a test strip having a sample application port (20) along an edge having notch(19) that assures proper alignment in the detector. Column 10-12 teach a fructosamine multiplayer test device where the multiple layers all have the same notch cut out. Column 11 lines 30 + teach use of radiation blocking layers and contamination prevention layers which have been read on the claimed "substantially opaque portion" and the "transparent window" respectively.
